O-Insights™ — The Unified AI Powered Platform

01

Dashboard

O-Insights™ for Milestone XProtect powers your system to the next level with a high range of functionality in optimizing time and performance while maximizing ROI and getting all of your data into XProtect. With the rich selection of widgets and agile workspace, you can effectively visualize your entire VMS in a single view. IoT data can also be seamlessly visualized on the dashboard, giving you real-time insights into connected devices. The Compliance Dashboard further ensures regulatory adherence, helping you stay compliant at all times.

02

Smart Reporting

Smart reporting that lets you easily create and modify reports with automated mailing and saving. With over 50 report types and limitless potential in customising your reports the way you desire, O-Insights Reporting is the perfect solution for all your security, compliance needs and more. You can also resolve issues with a single click with Action Reports.

03

Genie — AI for VMS

Genie is the world's first AI-based Business Intelligence tool for VMS. It enables users to quickly obtain camera and alarm details within XProtect by providing prompt responses to their queries. Genie aims to efficiently extract business intelligence, thereby empowering XProtect users.

04

IoT Drivers

Power your Milestone XProtect to go beyond VMS with our wide array of drivers that get you data from any IoT device and/or BMS/SCADA. Transform Milestone XProtect into a unified command and control platform for all 3rd-party systems and analytical events with our BACnet, OPC UA, MQTT, SNMP, and HTTPS drivers. Seamlessly visualize, and act on real-time operational data directly within your XProtect environment.

05

Command Center

The Command Center brings structure and efficiency to Incident Management. With the lowcode/ no-code interface, easily create simple or complex SOPs with conditional flows, monitor incident KPIs through dashboards, and assign tasks based on user roles. With built-in approval support and detailed reports of completed incidents, it ensures every step is tracked, accountable, and seamlessly executed.

06

Notification Manager

Get notifications for any alarm with Notification Manager. Instant notifications at your fingertips via Call, SMS, or WhatsApp.

07

Slider

Slide through multiple views automatically with O-Insights Slider. With easy sliding of views at custom time intervals, efficient monitoring of your cameras and Milestone XProtect views becomes seamless.

WHY CHOOSE O-INSIGHTS™

01

Native XProtect Integration

No new infrastructure. Works entirely inside your existing Milestone environment, deployed in under 10 minutes.

02

All Data, One Platform

Unify VMS feeds, IoT sensors, BMS systems and analytic events into a single operational view.

03

AI-Powered Intelligence

Genie brings natural language querying to XProtect — the world's first AI BI tool for video management.

Let's Connect.
