

AI OPERATIONS PLATFORM FOR PHYSICAL INFRASTRUCTURE

Monitor everything
Identify challenges
Know the fix

O-Insights Core monitors equipment, IoT sensors and third-party systems across your buildings and sites, detects problems as they arise, and tells your team exactly what to do. One login, one screen, one source of truth.

HOW CORE WORKS

Connect. Visualize. Automate. Understand.

Operating physical infrastructure is often challenged by fragmented tools, siloed data, and reactive workflows. O-Insights Core unifies your connected systems into a single operational view, enabling you to monitor, visualize, automate, and act before issues impact your operations.

Connect

Bring the equipment across your buildings and sites together.

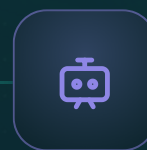

Visualize

Monitor every system live on intuitive dashboards and maps.

Automate

Identify problems in real time and alert the right people instantly.

Understand

Interact with your operational data through a conversational UI to understand issues and decide the next best action.

Real-time

Live updates as conditions change

Reliable

Built for high, dependable uptime

Any device

Connects to systems you already run

Scalable

Scales effortlessly from one location to multiple

BUILT FOR ANY OPERATION

Wherever you run physical infrastructure, O-Insights Core scales to fit, **from a single building to an entire city**. It is built to support a wide range of environments:

Real estate

Campuses

Transit

Tunnels

Smart cities

Facilities

Pharmaceutical

Hospitals

Data centres

and more

Five modules. One platform.

Workspace

Interactive, easy-to-use dashboards, smart maps and floor plans, pre-configured and fully customisable. Every site, asset and reading shown live, with out-of-limit values highlighted automatically.

Fault Detection & Diagnostics

Detect equipment and system issues early using rule-based logic and ML algorithms, diagnose the likely cause, and act before they lead to downtime, energy wastage, or operational impact.

Alarm Manager

Advanced, prioritized alarm management with notifications and escalations. Every issue reaches the right people the moment it arises, with the context to act.

Genie

A built-in conversational AI assistant that helps users understand operational issues in simple language. It explains what is wrong, highlights likely causes, and recommends the next best action.

Reporting

Scheduled, ready-to-share reports with a complete, searchable history for audits and reviews.

ON THE ROADMAP

O-Insights Core will continue to expand with new capabilities, including additional connectors, Predictive Maintenance, AI Agents, and Tenant Billing.

One platform, one login

Connects to anything

Works in any browser

Secure and scalable

Let's get started

Ready to bring your operations onto one platform? Choose the step that fits your requirements, and we will take it from there.

1

Discovery call

An introductory call to understand your operations and explore where Core can add value.

2

Live demo

A guided walkthrough of the Core platform.

3

Pilot deployment

A hands-on trial, deployed with your own data.
