

Effortless Live Monitoring of one of the largest warehouses in Asia made with O-Insights for Milestone XProtect

Effortless Live Monitoring of one of the largest warehouses in Asia made with O-Insights for Milestone XProtect

Challenge

Massive warehouses often face the challenge of security, monitoring, and reporting in that order. One of Asia's largest warehouses, which has extensive cameras and security devices, had a similar requirement. Conexao Technology Solutions was brought in by Texonic Instruments to cater to the same and enhance the system where the live monitoring and reporting of the entire system was seamlessly done.

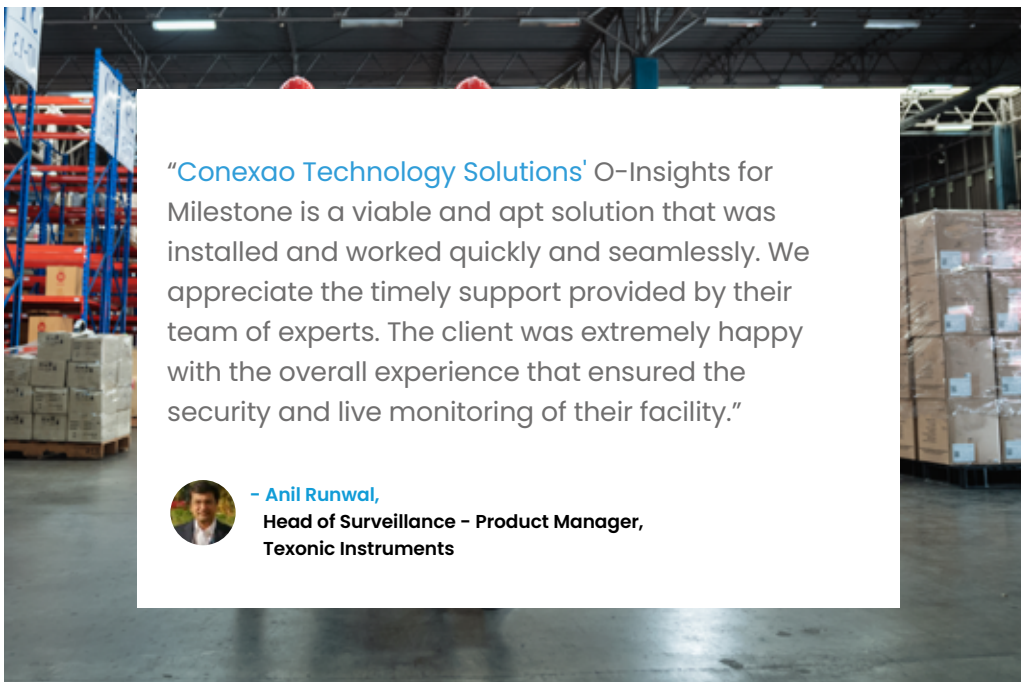

Solution

Conexao Technology Solutions deployed O-Insights for Milestone XProtect which integrated 4000+ cameras on a single VMS platform along with multiple advanced features like the integration of Intrusion Detection Systems, and third-party video analytics. In addition, the client received the live device status for all cameras, two way Talk back Devices, Perimeter Intrusion Radar, Network Horn, Duress Pole, Speakers, and Microphones.

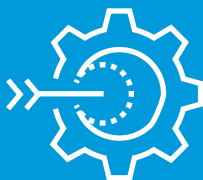

Monitoring the live health status of the system is of utmost importance in a warehouse facility, especially in one of such massive volume. O-Insights Dashboard ensured the same, and the weekly health checkup of the entire system could be viewed from the dashboard too.

O-Insights Reporting provided the client with the option of creating customized reports for all the devices and storage in the facility.

Fast Facts

- **Project Type:** O-Insights Workspace and Reporting Solution for Milestone XProtect
- **Distributor:** Texonic Instruments
- **Milestone Technology:** XProtect® Expert VMS
- **Key Technologies:** O-Insights Agile Workspace and Reporting

About Texonic Instruments

Texonic Instruments [↗]: Having started out as a distributor in Industrial Electronic Components and Measuring Instruments in 1965, the company ventured into a nascent IT infrastructure business in the early 90's. Since then Texonic Instruments has carved a niche for itself in the Technology Distribution industry. It is one of the few organizations that provides not only high-quality IT Infrastructure products but also unmatched Value-Added Distribution services to its Partners. With highly experienced and certified professionals, and a fast-growing network across India, Texonic Instruments continues its endeavor to provide cutting edge distribution services in an increasingly dynamic Technology space.

About Conexao Technology Solutions

Conexao Technology Solutions [↗] provides integrated solutions in Smart Building technologies using Software and IoT solutions that are crafted to increase efficiency and maximize productivity.

Fostered by a robust team of Automation, IT and Software experts with extensive and global experience, Conexao believes in using technology to create products for smart buildings and smart cities, such as applications for IoT and Video Systems, Energy Management, Tenant billing, Asset Management, Incident Management and others.
