

Seamless Consignment Tracking and Quality Assurance for a Pioneer in Manufacturing Using O-Insights for Milestone XProtect

Seamless Consignment Tracking and Quality Assurance for a Pioneer in Manufacturing Using O-Insights for Milestone XProtect

Challenge

A pioneer in the manufacturing industry with global presence and reputation was keen on optimizing their processes. This client has been at the forefront in terms of innovation, security and safety in the manufacturing business. They wanted to ensure the tracking of each consignment being manufactured, based on stipulated parameters. This was to establish that in the event of any quality or related challenges that may potentially arise, the recorded videos and snapshots could be employed.

Solution

Techno Honey Systems Pvt. Ltd. brought in Conexao Technologies Solutions at this point to plug the challenge. Conexao then deployed its flagship solution O-Insights for Milestone XProtect and integrated the bar code scanner information. Based on triggers, the automatic capture

of snapshots was initiated, and the files were saved with names based on client requirements. O-Insights was deployed on multiple workstations each linked to a camera. Bookmarks were also created automatically in Milestone. A central repository of all the images was then created and linked to the bar codes. This resulted in catering to and exceeding the client requirements.

“Conexao Technology Solutions’ offered an apt solution in the form of O-Insights and ensured timely deployment by their expert team. The client was extremely happy with the speed and effectivity of the deployment and the support offered by the Conexao team.”

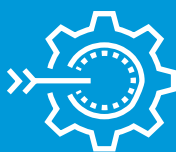

- Harshad G Tulsulkar,
Director - Techno Honey
Systems Pvt Ltd

“We were able to unify the different systems including bar code scanners and camera information on the Milestone environment to streamline the operations & troubleshooting of the client’s manufacturing processes. The technical ability of the Techno Honey team was instrumental in the implementation of this solution and in the effective delivery of the project.”

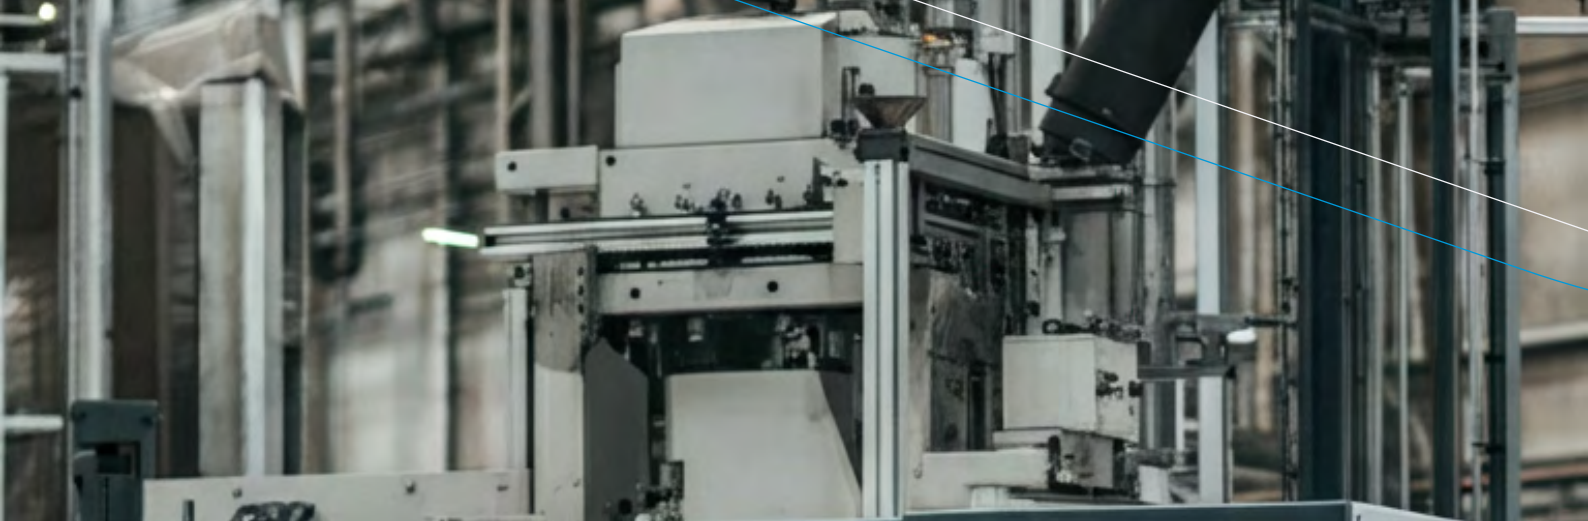

- Gautam Dhore,
Sales Head - Conexao
Technology Solutions

Fast Facts

- **Project Type:** O-Insights for Milestone XProtect
- **Reseller:** Techno Honey Systems Pvt. Ltd.
- **Key Technologies:** O-Insights for Milestone XProtect

About Techno Honey Systems Pvt. Ltd.

[Techno Honey Systems Pvt. Ltd.](#) [↗]: Techno Honey Systems Pvt. Ltd. are expert System Integrators for electronic security and equipment solutions with a passion to architect the best of the security options in a structured innovative pattern. The fast-growing enterprise is driven by work indicators - Design, Planning, Consulting and Integrating - driven by a no-compromise approach on service and pricing.

About Conexao Technology Solutions

[Conexao Technology Solutions](#) [↗] provides integrated solutions in Smart Building technologies using Software and IoT solutions that are crafted to increase efficiency and maximize productivity.

Fostered by a robust team of Automation, IT and Software experts with extensive and global experience, Conexao believes in using technology to create products for smart buildings and smart cities, such as applications for IoT and Video Systems, Energy Management, Tenant billing, Asset Management, Incident Management and others.
