Workspace: O-Insights™ for Milestone XProtect powers your system to the next level with the high range of functionality in optimizing time & performance while maximizing ROI and getting all of your data into Milestone. With the rich selection of widgets and agile workspace, you can effectively visualize your entire VMS in a single view. And with the O-Insights Mobile App designed to work with Android, view realtime camera status, locate cameras near you based on GIS maps, and get live camera feeds and playback on the move.

Reporting: Smart reporting that lets you easily create and modify reports with automated mailing & saving. With over 50 report types, and endless possibilities in having your reports just the way you want it, O-Insights Reporting is the perfect solution that solves all your security, compliance needs and more. Plus, resolve issues with a single click with action reports.

IoT Drivers: Power your Milestone XProtect to go beyond VMS with our wide array of drivers that get you data from any of the IoT devices and/ or BMS/SCADA. Transform Milestone XProtect as a unified command and control platform for all 3rd party systems & analytical events with our BACnet, OPC UA, MQTT, SNMP, and LoRaWAN drivers.

Slider: Slide through multiple views automatically with O-Insights Slider. With easy sliding of views with custom time interval, efficient monitoring of your cameras and Milestone XProtect views becomes seamless.

Command Center: Managing any incident effectively is at your fingertips now. Automate the complex actions that are to be carried out post any incident through intuitive interface of the Command Center.

O-Connect: Get notifications for any alarm with O-Connect. Instant notifications at your fingertips via Call, SMS, WhatsApp or App Notification.

Genie: Genie, powered by NLP technology, is a pioneering search-based business intelligence tool. It enables users to quickly obtain camera and alarm details within XProtect by providing prompt responses to their queries. Genie aims to efficiently extract business intelligence from VMS systems, thereby empowering Milestone VMS users.
